

March Updates

We wanted to remind everyone that our Bull Breeding Soundness promotion continues until the end of March. Take advantage of this promotion to ensure that your bulls are able to meet your expectations this breeding season. It's better to find out if there is a problem while there is still time to correct it.

Continuing Education

We are excited to announce that COVS will be hosting continuing education meetings for our bovine producers this spring. For our dairy producers we are excited to be hosting another mastitis round table. The last time we had this event there was a lot of good discussion and we wanted to ensure that everyone has the opportunity to attend. For our beef producers we will be hosting a talk that addresses vaccination programs and deworming before cows and calves go out on pasture. Both of these meetings will be held on Wednesday, April 10th at the Minesing Community Centre. The mastitis round table will be held at 11:00 AM and the beef talk will be taking place at 7:00 PM. If you would like to attend, please contact the office before March 29th, as space will be limited.

Equine Vaccinations

For our equine clients, vaccination season is almost upon us. You should be receiving reminders the month before your horses are due. Keep your eyes open for some information on our vaccine recommendations that will be coming out in May. Finally, thank you for your support of dental month; with your help it was a great success.

Policy Update

We wanted to let all of our clients know that we are making some changes to our inventory. To ensure that we will be able to provide you with the medications you require, please call the office with at least 24-48 hours notice prior to pickup from Monday to Thursday. This will allow us to order products and make sure they are here for you to pick up.
