Information Evening on Equine Parasite Control

Please join us at Georgian College on Wednesday 28 May from 7:00 to 9:00 PM to learn about the current evidence about deworming and other measures to effectively control equine parasites and efforts to prevent the development of resistance to deworming medications. Refreshments will be served. The meeting is generously sponsored by Zoetis.

Veterinary Spinal Manipulation Therapy (VSMT) Special Continues in May

Spinal adjustment can help horses perform at their best when you need them to. Our special offer continues this month, with 10% off VSMT assessment and treatment by Dr. Rainee Stoddart.

Veterinarians combine their knowledge and experience of equine movement and lameness with the techniques used by chiropractors to enhance the value of VSMT to your horse.

Victoria Day Holiday Hours

The office will be closed on Monday 20 May. One of our veterinarians will be on call for emergencies over the long weekend, and can be reached if necessary by phoning our main number 705-722-3232 and selecting 1 for emergency.

Dairy ProAction Meetings Update

With the new Biosecurity portion of ProAction set to start September 2019, Dr. Christie Ryan has attended the advisor training to better serve our dairy clients. As part of her advisor duties, Dr. Ryan hosted ProAction meetings at the beginning of May to get our dairy producers up to speed with the new program; these meetings were free to attend for our dairy clients. Though attendance of these meetings was not required, they will help better prepare producers for the next stage of the ProAction program. For those producers that were unable to attend the meetings or for those that would like an additional on-farm one-on-one ProAction visit to go over the program, develop and fine-tune SOPs, and ensure you are ready for your validation there is part funding from DFO to facilitate Dr. Ryan completing these visits with you. If you would like to book a one-on-one ProAction visit for your farm or have any further questions or concerns about ProAction please give the office a call at 705-722-3232.

May Updates Continued

Reminder about Prescription Medications

Please phone the office at least 24 hours before you need to pick up medication at the office so that we can make sure we have what you need in stock. In order to ensure proper veterinary oversight of prescription medications, our veterinarians will be reviewing long-standing prescriptions over the next few months to ensure that drugs being used in our clients' herd and stables are still the most effective and appropriate for the conditions being treated.

Free Webinar for Cattle Producers

As part of our commitment to providing our clients ongoing and recent information, we are pleased to partner with Zoetis who are offering a webinar entitled "Optimal immunization for better long-term productivity". The 30-minute webinar will focus on calf care, with specific importance placed on the first 56 days of life, and the Inforce vaccine. This webinar will be valuable to both our dairy and beef clients. The webinar will take place on Wednesday, May 15th at 12:30pm.
