

June Updates

Equine Education Evening

We would like to thank everyone who came out to our latest equine education evening to learn all about deworming. Another thank you to Zoetis who was our sponsor for this event. Keep an eye on our website for a summary of what was discussed.

We enjoy holding events like this for our clients and plan on having more in the future. These events are for you, our clients, so if you have any comments or suggestions we would like to hear from you. Please contact the office through our email: info@centralontariovet.com.

Fecal Egg Counts

To really drive home the importance of logical deworming protocols we have revamped our in clinic fecal egg count pricing. We believe that fecal egg counts are an important part of a targeted deworming program and therefore we want to make it easier for you to utilize them. The price of our in-clinic fecal egg count has gone down and we have instituted an even further discounted bulk price when 5 or more samples are brought in from the same farm. In addition to this, for the months of June - August we are offering a promotional price on fecal egg counts for further savings.

ProAction Reminders

Thank you to all of our dairy producers who attended one of our two ProAction meetings with Dr. Christie Ryan. It was a great turn out and we hope our producers are now well-informed enough to navigate the upcoming ProAction Biosecurity program.

For those who would like additional support in updating or reviewing their ProAction paperwork and SOPs, there is still the option to book a visit with Dr. Ryan that is partly funded by DFO. Additionally, for those who have their ProAction on-farm assessment within the next 6 months, you are reminded to call to book your risk assessment (RAMP) visit with one of our veterinarians. Lastly, if you intend to use Dr. Ryan as your ProAction advisor please make sure you fill out the change of advisor form, listing Dr. Ryan with the ProAction number "PA065" and send that to DFO.

If you have any further questions or concerns about the program or scheduling visits do not hesitate to give the office a call.
